Build It International is an NGO which creates opportunities for young people in Zambia between 18 and 35 years old. We look to train young people who have had little or no formal education but have a genuine interest and desire to learn new skills. With the acquisition of these new skills, they are able to earn a living and provide for their families.

- We help unemployed young people in Zambia to build themselves into skilled individuals who can earn a living and provide for their families.
- Build skills training programmes which are fit to meet the needs of this growing country including bricklaying, carpentry, painting, plastering and tiling.
- We also support our graduates beyond their initial training, working to connect them to employment and mentoring opportunities.
- Over the years, our effort has led to successful programmes in building skills training delivered through community-based projects such as schools and clinics.

In recent years Build It International have seen the expansion of their skills training through delivery at their training Centre for Excellence as well as in communities.

They have witnessed remarkable growth and transformation by offering the following programmes:

- Construction trades multi-skills
- Rough carpentry and steel-fixing
- Tiling and modular paving

Having affiliated with the internationally recognised awarding body, NOCN Group, Build It International receives the following benefits:

- Upon completion of the Centre for Excellence training programme, trainees receive a 'Certificate of Training' endorsed by NOCN.
- Potential for our trainees to progress into higher-level qualifications which will have international recognition.
- Confirmation of Build It International's status as a leading provider of construction training in Zambia.
- Enhance our reputation with existing and potential stakeholders such as affiliate contractors, the private sector and the government etc.

Patrick Mwamba, Senior Quality Assurance Officer
