Taylor Care Training is a family run business, which provides bespoke, specialist training for learners who work in, or wish to enter the Health and Social Care sector. They have been offering NOCN Diploma's in Adult Care at Levels 2, 3, and 5 for over four months.

These vocationally based qualifications offer learners the opportunity to develop and demonstrate their understanding and knowledge of the skills required to work in an Adult Care setting.

Taylor Care Training's support doesn't stop when a learner achieves their qualification. They continue to offer after care, a crucial service which helps learners to realise their career aspirations.

Helen Taylor, Managing Director, at Taylor Care Training, first worked with NOCN around 15 years ago. She found NOCN to be an understanding and collaborative Awarding Organisation and her experience stayed with her. Helen commented that she knew NOCN were the AO she wanted to work with when she set up her own company.

How has the qualification helped your learners in achieving their future goals?

"Most of my Level 3 learners are from India, coming through on the Governments sponsorship scheme. The Level 3 Diploma in Adult Care has helped five learners so far in achieving either a Team Leader position with their current employers or an acting managers position."

What do your learners have to say about the qualification?

"My learners are really enjoying the Level 3 Diploma in Adult Care. It has provided them with the knowledge, skills and behaviours needed to confirm their competence as an Adult Care Worker in England. Learners that have completed this qualification, can now demonstrate best practice in adult social care, whilst also modelling this for other in an adult care setting."

Working with NOCN on this qualification has been an absolute dream, they are supportive and pro-active with any issues or queries. I couldn't ask for better.
