JADE Youth and Community

Sector: Qualifications

Location: Sheffield, South Yorkshire

We have known about NOCN for a long time, previously working with several organisations who are accredited centres.

Our organisation formed through an NOCN course, following the delivery of a music technology and DJ course, young people came together and decided to set up a constituted organisation. 20 years later we are now a registered charity supporting 100s of young people per year.

The support provided by NOCN to help us become an accredited centre was fantastic, there was lots of helpful information and guidance online, and we were able to receive one to one telephone support whenever we needed help.

Becoming an NOCN accredited centre has added huge value to our offer for children and young people, ensuring they have access to high quality, recognised qualifications that meet their needs,

NOCN provide a completely unique offer, the sheer range of qualifications they provide, and the fact that many are suited to the needs of disadvantaged young people, mean they are perfectly suited to our needs.

I would fully recommend NOCN to other centres, especially those working with young people, the breadth of qualifications on offer, the fact they are nationally recognised and suited to the needs of our young people mean that we have significantly improved our offer through becoming an NOCN accredited centre.
