Qualification Specification amendment:

The following has been added to the Qualification Specification.

“If a learner is, as part of their usual working practice, assessing in an online space, the assessment of the learner carrying out their assessment may take place in an electronic environment such as via video conferencing or other safe digital space, as this means that all involved are in the same ‘location’ (an online space). The Centre assessor (hereafter referred to as the Tutor) must ensure that they carry out and document appropriate checks to ensure that:

- The identity of those involved (the learner assessing and any learners they are carrying out assessment on) is verified.
- The assessment being observed by the Tutor is being carried out appropriately and no advantage is being given by virtue of the remote environment.

To ensure that IQA and EQA processes continue to be robust, these observations must be recorded. Agreement for a video recording, subject to confidentiality, safeguarding and GDPR legal requirement, must be obtained in writing (email is acceptable) from all involved. If these checks and balances can not take place, remote assessment is not permitted.”

If you have any questions, please contact your Business Development Advisor.

Kind regards,

NOCN.
