

## NOCN International Programme

<b>Title</b>	NOCN International Level 3 Certificate in Advanced Defensive Driving Road Safety and Risk Management		
<b>Topic Summary</b>	<ul style="list-style-type: none"> <li>• Principles of Advanced Defensive Driving</li> <li>• Road Safety Awareness and Collision Prevention</li> <li>• Risk Management in Driving Operations</li> <li>• Fire Safety</li> <li>• Basic First aid and CPR</li> </ul>		
<b>Target Audience</b>	Professional drivers (e.g., light/heavy vehicle operators, logistics drivers, Chauffeurs, emergency response drivers). Fleet supervisors, transport Managers, and road safety officers. Individuals seeking formal recognition of their advanced defensive driving competence.	<b>Length of Study</b>	60 Hours GLH

<b>Unit(s) Learning Outcomes</b>	<b>Learning Outcome - 1:</b> 1.1. Explain the key principles and objectives of defensive driving. 1.2. Identify human, environmental, and vehicle-related risk factors. 1.3. Apply observation, anticipation, and planning skills during driving. 1.4. Demonstrate proper use of space management and safe following distances.	<b>Assessment Criteria:</b> 1.1 Explain the key principles and objectives of defensive driving. 1.2 Identify human, environmental, and vehicle-related risk factors. 1.3 Apply observation, anticipation, and planning skills during driving. 1.4 Demonstrate proper use of space management and safe following distances..
--------------------------------------	---	---

	<p><b>Learning Outcome - 2:</b></p> <p>2.1. Interpret international and national road safety regulations.</p> <p>2.2. Explain collision causation and methods to prevent accidents.</p> <p>2.3. Demonstrate knowledge of road signage, markings, and legal responsibilities.</p> <p>2.4. Apply safe overtaking, lane discipline, and speed management practices.</p>	<p><b>Assessment Criteria:</b></p> <p>2.1 Interpret international and national road safety regulations.</p> <p>2.2 Explain collision causation and methods to prevent accidents.</p> <p>2.3 Demonstrate knowledge of road signage, markings, and legal responsibilities.</p> <p>2.4 Apply safe overtaking, lane discipline, and speed management practices.</p>
	<p><b>Learning Outcome - 3:</b></p> <p>3.1. Conduct driving-related risk assessments using a structured approach.</p> <p>3.2. Identify potential hazards in various driving environments.</p> <p>3.3. Propose risk control measures and safe systems of work.</p> <p>3.4. Integrate risk management principles into daily driving activities.</p>	<p><b>Assessment Criteria:</b></p> <p>3.1 Carry out structured risk assessments related to driving activities.</p> <p>3.2 Recognize potential hazards across different driving conditions and environments.</p> <p>3.3 Recommend appropriate control measures and implement safe working practices.</p> <p>3.4 Apply risk management principles consistently in everyday driving situations.</p>
	<p><b>Learning Outcome - 4:</b></p> <p>4.1. Identify common causes of vehicle and workplace fires.</p> <p>4.2. Explain the principles of fire prevention and fire triangle concepts.</p> <p>4.3. Select and use appropriate fire extinguishers safely for different types of fires.</p> <p>4.4. Describe emergency procedures for fire incidents, including evacuation and communication.</p> <p>4.5. Demonstrate safe behaviour and awareness to reduce fire risks during driving and operational activities.</p>	<p><b>Assessment Criteria:</b></p> <p>4.1 Recognize common factors that can lead to vehicle and workplace fires.</p> <p>4.2 Describe the key principles of fire prevention and explain the components of the fire triangle.</p> <p>4.3 Identify, select, and operate suitable fire extinguishers safely for various fire types.</p> <p>4.4 Explain the correct emergency actions to take during a fire, including evacuation and communication procedures.</p> <p>4.5 Demonstrate safe practices and fire awareness to minimize risks during driving and work operations.</p>

	<p><b>Learning Outcome - 5:</b></p> <p>5.1. Explain the principles and importance of first aid and CPR in emergencies.</p> <p>5.2. Assess an incident scene and ensure personal and bystander safety.</p> <p>5.3. Demonstrate how to check responsiveness, breathing, and circulation of a casualty.</p> <p>5.4. Perform CPR correctly on adults (and where applicable, on children and infants).</p> <p>5.5. Provide appropriate first aid for common injuries such as bleeding, burns, shock, and fractures.</p> <p>5.6. Describe the correct procedures for contacting emergency medical services and handing over a casualty.</p>	<p><b>Assessment Criteria:</b></p> <p><b>5.1</b> Outline the key concepts and significance of providing first aid and performing CPR during emergencies.</p> <p><b>5.2</b> Examine an emergency scene to identify hazards and maintain the safety of yourself and others.</p> <p><b>5.3</b> Show how to assess a casualty for responsiveness, breathing, and circulation.</p> <p><b>5.4</b> Carry out CPR procedures effectively for adults and, when necessary, for children and infants.</p> <p><b>5.5</b> Deliver suitable first aid care for common injuries, including bleeding, burns, shock, and fractures.</p> <p><b>5.6</b> Explain the appropriate steps for contacting emergency services and transferring care of the casualty.</p>
